ABOUT ME

I am a passionate, confident, and highly motivated individual with a strong foundation in data-driven decision-making and analytical thinking. Through continuous learning and skill development, I have cultivated the expertise and dedication needed to solve complex problems effectively. I am eager to apply my knowledge and contribute meaningfully to the growth and success of the company.

EDUCATION

RAMCO INSTITUTE OF TECHNOLOGY

2022 - 2026

7.61 CGPA

TECHNICAL SKILLS

- Python
- Java
- HTML/CSS
- Power BI
- Machine Learning
- PostgreSQL

SKILLS & INTERESTS

- Languages: Tamil, English
- Quick to Adapt
- Continuous Learner
- Interests: Music, Travel

CERTIFICATIONS

- Foundation of Cyber Security - Coursera
- Cloud Architecture - AWS
- Microsoft PowerBI - Ramco
- Networking Basics

WORK EXPERIENCE

CODSOFT - Remote, India

Completed a 4-week virtual internship in Web Development at Codesoft (Nov 2023), gaining hands-on experience in building responsive and interactive web pages using HTML, CSS, and JavaScript.

Icanio Technologies - Tirunelveli, India

Sep 2024 - May 2025

Completed an internship focused on Node.js for backend development and database integration. Worked with MongoDB, PostgreSQL, Sequelize, and Prisma to build and manage data driven applications.

MINI PROJECTS

Ecommerce Website - HTML, CSS, JavaScript

A full-stack e-commerce website built using the MERN stack, featuring user authentication, product browsing, shopping cart, and secure checkout with promo code support. Includes an admin panel for managing products, users, and orders, with a responsive and user-friendly design.

Internship portal - MERN Stack and PostgreSQL, MongoDB

A web-based Internship Portal developed using React.js, Node.js, and Express.js with PostgreSQL and MongoDB integration. The platform enables students to register for domain-specific internships, supports admin shortlisting, and facilitates a structured multi-round selection process including technical, general knowledge, aptitude tests, and an HR interview.

Image Classification using Neural Networking

Developed an image classification model using neural networks, applying deep learning techniques to improve accuracy and automate recognition. Leveraged convolutional neural network architectures to extract meaningful features from image data, enabling robust and scalable classification across diverse datasets.
